

Protein Formulas

Created for individual nail conditions requiring specific treatment, each protein formula offers special ingredients to bond the nail layers together. The formulas build a strong, yet flexible foundation which is resistant to peeling, chipping and splitting. After a professional consultation, your nailtiques specialist will recommend an individually tailored treatment programme to achieve the best results for you.

Formula 1

A perfect balance of proteins and conditioners to protect and maintain healthy nails, preventing them from becoming hard, Formula 1 maintains strength and flexibility.

When to use? Best applied just before you go to bed, Formula 1 should be used 2 times a week on its own as a treatment. It can also be used as a base coat or top coat with polish.

Formula 2

Designed for soft, peeling and weak nails, Formula 2 stimulates rapid growth and strengthens nails.

When to use? Apply daily without colour, remembering to remove weekly using nailtiques Non-Acetone Remover. Decrease application and apply colour when nails become stronger, finally graduating to Formula 1 for maintenance.

Formula 3

Developed for hard, dry or ridged nails, especially toenails. Formula 3 is also ideal for post-menopausal nails which can often be dry and brittle.

When to use? Formula 3 can be used on its own, reapplying 3 times a week, or as a base coat and top coat with coloured polish.

Formula 2 plus

This formula is for excessively soft and peeling nails that haven't responded to Formula 2 within 4 weeks.

When to use? Apply Formula 2 Plus everyday, remembering to remove weekly. Once nails begin to improve your nailtiques specialist will recommend the most suitable follow on formula. Formula 2 Plus should not be used after artificial nail removal.

Formula 2 kit

This kit contains everything you need to get started. Includes Formula 2, Oil Therapy and Cuticle & Skin Gel.

After-Artificial Treatment

This specially developed two part treatment nourishes and replenishes nails with vital ingredients following artificial nail removal.

When to use? Apply Formula A everyday for 5 days. Remove layers and continue this cycle until the bottle is empty. Continue the same process with Formula B. Use Cuticle and Skin Gel to soften dry cuticles.

Cuticle Care Oil

nailtiques Cuticle Care Oil comes with a convenient rollerball applicator, instantly softening cuticles and sealing in moisture.

When to use? Roll formula onto clean, dry skin and nails. Use fingertips to massage into surrounding skin and nails.

Oil Therapy

A delicate blend of vitamin enriched oils, Oil Therapy is specifically formulated to prevent and treat dry cuticles.

When to use? Massage into cuticles as often as required to encourage nail growth. Also excellent when applied over colour polish to aid drying and help prevent smudges.

Cuticle & Skin Gel

Extremely beneficial for dry skin, Cuticle & Skin Gel can be used on all areas of the body. Especially good for dry, cracked cuticles, dry elbows, calluses, or any area that needs hydration.

When to use? Use sparingly anytime on cuticles and skin which need moisture.

Nail Moisturiser

A unique non-greasy, conditioning nail cream, enriched with soluble plant collagen to restore moisture and promote nail flexibility. Jojoba and Aloe nourish and condition the nail.

When to use? Use regularly to promote greater nail strength and flexible nails. Apply a small amount to the nail plate before filing to prevent dehydration.

Combination File

Designed especially for home use, this efficient emery board is gentle, long-lasting and sanitisable.

When to use? Whenever you need to shape and file your nails.

Hand Conditioner

Combining pure Aloe, Jojoba oil, Glycerine and natural soluble collagen, this deeply nourishing cream is lightweight, non-greasy and fast absorbing. Formulated to rehydrate and condition the hands and cuticles, it softens the skin but not the nails.

When to use? Use everyday for soft, smooth hands and cuticles.

Non-Acetone Remover

This remover strips nothing away but the polish. Gentle and 100% acetone free, it contains Aloe Vera and conditioners which help to prevent dry, brittle nails and cuticles.

When to use? Use to prepare the nail for treatment application or a coat of fresh colour.

Cushioned Mini Sponge File

A perfect size for your handbag, this file is double sided for dual usage.

When to use? Use the green side for shaping and filing nails, and the pink side for removing ridges from the nail surface.

Avocado Foot Cream

Rich in avocado oil, this cream is deeply penetrating without being greasy. Specially formulated for feet to aid healing of rough, dry or cracked skin.

When to use? Apply daily to legs, feet and heels, concentrating especially on rough, dry areas. May also be used as an intensive treatment for hands.

Award winning

Nothing else even comes close to nailtiques, but don't just take our word for it. After being awarded "Best Treatment for Problem Nails" for three years in a row, nailtiques Protein Formula 2 entered InStyle magazine's prestigious Hall of Fame, confirming its status as a classic beauty must-have.
